COS 201 — Week 3 Practical

Programs on Variables, Data Types, Expressions and Input/Output.

Programs

- `SimpleCalculator.java` — takes two numbers, prints sum, difference, product, quotient and remainder.
- `AverageCalculator.java` — takes three scores, prints total and average.
- `ItemCost.java` — takes item name, unit price and quantity, prints total cost.

Requirements

JDK 8 or later (check with `java -version`).

Compile and run

```
javac SimpleCalculator.java
java SimpleCalculator

javac AverageCalculator.java
java AverageCalculator

javac ItemCost.java
java ItemCost
```

Sample run (ItemCost)

```
Enter item name: Notebook
Enter unit price: 250.50
Enter quantity: 4
Item: Notebook
Unit price: 250.50
Quantity: 4
Total cost: 1002.00
```
